Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4, 9-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Stroupe et al.-5,664,988.

Stroupe discloses a wafer polisher with a workpiece carrier having a ring (40) rotatable within an opening of the carrier and having a discontinuity (48) therein.

Claims 6-8, 14-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee-6,699,110.

Lee discloses polishing a disc-shaped workpiece within an opening of a carrier wherein a disk member is inserted into hole of disc workpiece and polished by member (33).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Stroupe et al. in view of Kai et al-5,899,743.

Stroupe does not disclose polishing both sides of the wafer. However, Kai et al. teaches it is old and well-known to polish both sides of the wafer simultaneously in order to save time and cost. Therefore, it would have been obvious to one of ordinary skill in the art at time invention was made to double-side polish the wafer of Stroupe in order to be time and cost efficient.

Claims 5 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stroupe in view of Lee.

Stroupe does not disclose inserted a member into a hole of the workpiece. However, Lee teaches inserted a disk member into a hole of a disk-shaped workpiece in order to properly mount workpiece. Therefore, it would have been obvious to one of

Art Unit: 3723

ordinary skill in the art at time invention was made to use an insertion member, as taught by Lee, in the apparatus disclosed by Stroupe in order to properly mount workpieces having a central hole.

Response to Arguments

Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.
